

Your health is important to us.

 SWITZERLAND

WHAT IS SOMAX FINANCE?

- Somax Token is a community driven DeFi cryptocurrency, with the aim to become the boss of Safemoon! Two main functions happen during a trade, RFI static rewards distributed to holders and LP acquisition.
- SomaxPay is an all-in-one wallet that works with the Binance Smart Chain, making it easier to use SMX.
- Our aim is to develop blockchain technology in the health sector and to create a digital ledger in the health sector.

SOMAX (SMX)

- We show how the Somax blockchain technology supports a distributed payment network and improves methods for receiving and sharing health data. How identity components fit into blockchains, how validated data can form the basis for a single medical identity, how cryptography can support a physician's secure approval of healthcare data among patients related to their profession, how Somax technology can automate and eliminate many internal quality controls and how patient claims they are. We will show you how you can change your processes. Strengthening a shared infrastructure can bring new efficiencies to patients and healthcare providers, and we will have an impact on labor costs, reconciliation efforts, automated decision-making rates and the overall member experience.

SOMAX => FEATURES

➔ **Total Supply**
1.000.000.000.000.000

➔ **Automatic Liquidity Pool**
On top of redistribution, a further 5% transaction deduction is applied to grow liquidity pool. This helps stabilize the token price over time.

➔ **Rewards For Holding**
Holders receive a share of 5% fees applied to every transaction. Essentially taxing swing traders, while rewarding holding.

➔ **Fair Community Launch**
Somax are sold via a fair launch for anyone in the community to buy without any pre-sale. This gives anyone a chance to buy in early.

\$SMX – SOMAX FINANCE

ONE OF THE FIRST UNIQUE CONTRACTS WITH ONLY 10% TAX. 5% GOES STRAIGHT TO LIQUIDITY FOR A HEALTHY LIQUIDITY POOL, 5% IS DISTRIBUTED TO WALLET HOLDERS..
